

RELIABLE, SECURE & EASY-TO-USE TRIBAL COMMUNICATION TECHNOLOGY

The ability to quickly alert your entire Tribe and collaborate with council members and responders is vital for keeping reservations connected and safe during a crisis. Regroup provides state of the art Tribal communication technology that allows Tribes and Nations to quickly and reliably communicate with all members before, during and after disaster strikes. Regroup's multimodal platform and integration with IPAWS allows you to reach members in multiple locations and remote areas. Regroup's multimodal platform and integration with IPAWS allows you to reach members in multiple locations and remote areas.

Regroup's award-winning mass notification platform provides Tribes and Nations with a cost-effective, all-in-one solution for emergency and day-to-day Tribal communications. As each Tribe and Nation has its own unique set of communication challenges, our team will customize a solution to address the specific needs of each community.

WHY REGROUP?

We provide Tribes and Nations with an easy-to-use, yet powerful mass communication platform with robust tools for fast and reliable communications, including:

- ✓ **AN INTUITIVE INTERFACE** that makes messaging easy for users of all abilities.
- ✓ **STATE-OF-THE-ART**, multimodal Tribal communications to mobile devices, landlines & email.
- ✓ **REGROUP MOBILE APP** for encrypted, two-way communication via push notifications.
- ✓ **AUTOMATED NWS/NOAA** weather alerts are sent to the Tribe as soon as issued.
- ✓ **AN UNLIMITED NUMBER OF GROUPS**, each with customized administrator privileges.
- ✓ **COMPREHENSIVE GEO-MAPPING** with specific basemaps, shapefiles and KML files.
- ✓ **NATIONS WITH MULTIPLE RESERVATIONS** can purchase Regroup for use by all of their geographically dispersed Tribes.

DAY-TO-DAY

- Changes to council services or hours
- Announcements of public meetings and activities
- Coordinating with work crews in the field
- Connect with consultants and service providers
- Notification of road work and closures

EMERGENCY

- Active shooters or terrorist activity
- Hazmat spills
- Shelter-in-place or evacuation orders
- Advance warning of severe weather
- Public health emergencies

- Single sign-on
- Rich media messages
- The ability to text-in to join a group
- Advanced messaging options like Ad Hoc, geo-targeted and scheduled messaging
- Real-time NWS/NOAA weather watches and warnings
- RSS feeds for websites and portals
- Dedicated short codes
- Automatic database synchronization
- Adjustable call throttling
- 99.99% uptime

INTEGRATED PUBLIC ALERT AND WARNING SYSTEM (IPAWS)

Tribes and Nations can overcome barriers in alerting Tribal members when there are potential threats to property or lives by using the United States' official alerting platform. Regroup exceeds industry standards and has been shortlisted as a preferred provider for IPAWS and is CAP (Common Alerting Protocol) compliant alert origination platform. Among the many ways IPAWS ensures the public receives critical, life-saving information includes cable and analogue TV and radio as well as Wireless Emergency Alerts (WEA), which supersede cell towers to reach every cell phone user within the given area.

GEO-TARGETED MESSAGING AND MAPPING CAPABILITIES

Regroup's geo-targeted messaging* enables emergency managers and responders to easily reach public safety officials and Tribal members, based on their location, by drawing a multi-point polygon shape on a map or defined radius around a given point. Easily visualize property lines, roads, rivers and other geographical detail with Regroup's mapping platform and increase situational awareness with live weather radar mosaics, precipitation forecasts and storm alerts.

** Included free of charge in subscription*

REGROUP MOBILE APP

Regroup Mobile App enables you to access the full power of Regroup right from your iOS or Android smartphone. Provides real-time, two-way communication via push notifications, to ensure critical alerts are received — even when other communication lines are down. Our QuickPost feature enables users to quickly reach emergency responders, specific individuals or entire Tribes using pre-written message templates, pre-recorded voice alerts, multimedia and event-specific attachments.

AUTOMATED NWS WEATHER ALERTS

Our easy-to-use integration with National Weather Service (NWS) and the National Oceanic and Atmospheric Administration (NOAA) takes the guesswork out of alerting Tribal officials and the entire reservation about potentially hazardous weather or wildfire conditions. Automating the alerting process accelerates transmission of critical alerts and reduces the margin for human error.

Osage Nation has been using Regroup for tribal communications since 2013 and we are extremely happy with the system. If I could describe Regroup in one word it would be "dependable" and their client support team has been very responsive when we've had questions or needed assistance.

Bobby Tallchief

Director of Emergency Management | Osage Nation
